ABOUT ME

I am a video game developer with over a year of experience in the industry, specializing in game design and programming. I have worked on faculty projects and large-scale productions using Unity, C#, UEFN, and Verse. At Trick Studios, I contributed to **Sugartown** and **Super Jump**, focusing on NFT/multiverse gaming and competitive multiplayer experiences.

EXPERIENCE

Unity Game Developer

Trick Studios

2023 - Present

<https://www.trickgs.com>

For **Super Jump**, a competitive free-for-all Box Arena, I was responsible for developing gameplay mechanics, and implementing key systems like daily rewards, player rankings, progress saving, and a custom UI. The technologies used on this project were Unreal, UEFN, and Verse programming.

Technologies: Unreal, UEFN, Verse

In **SugarTown**, an NFT and multiverse-based game, I worked on bug fixing, integrated a custom UI package, and helped implement new gameplay mechanics to keep the game engaging.

Technologies: Unity, C#

FEATURED PROJECTS

- **Super Jump - Trick Studios**

Super Jump is a box arena shooter themed around the G2 Esports team, developed in Fortnite Creative 2.0 (UEFN). Features a daily rewards system, a killed-based ranking system, progress saving, leaderboards, custom UI, and missions. It was built using Unreal Engine, UEFN, and programmed in Verse.
